

11:45 - 12:30

Panel: Implementation of the RBT Guidelines

Experience with integrating RBT

Louis ten Bosch

Radboud University, Nijmegen, NL

Experience RBT

What worked: enthusiasm increasing with age!

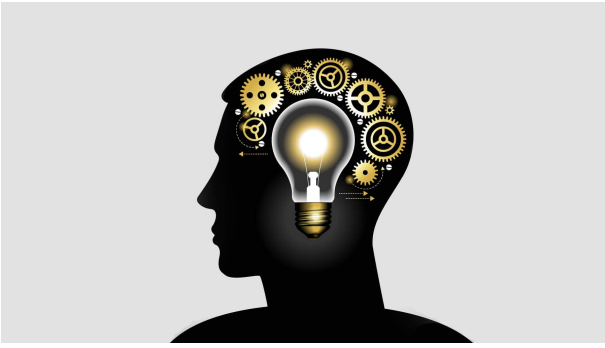

- In general, students like involvement in research programs
- Especially in the master and in the research master
- Successful implementation of RBT depends on the students' background (AI/linguistics)

What it did not work:

- Research not always easy to split into 'feasible' portions
- Applicability depending on study load and curriculum at host institute

Recommendations

If you would want to implement RBT:

- Chop research into feasible portions, make transparent learning goals
- Creative part versus tedious/repetitive part
- Take into account student's own interest and background
